

# Checklist of naturally occurring pathogens of insects and mites in Norway

**Ingeborg Klingen, Solveig Haukeland Salinas & Richard Meadow**

Klingen, I., Salinas, S.H. & Meadow, R. 2002. Checklist of naturally occurring pathogens of insects and mites in Norway. *Norw. J. Entomol.* 49, 23-28.

A checklist of naturally occurring microbes and nematodes that are pathogenic to insects and mites in Norway is presented. All records are listed by pathogen group (fungi, bacteria, viruses, and nematodes). Each record is listed with reference to the original author, and subsequent references have been included. The checklist should be updated periodically to assist researchers and policy makers within the field of entomology and crop protection.

Keywords: arthropod pathogens, Norway, insects, mites.
